# Shamanic Retreat « <u>Sky & Earth</u> »

21-24 August 2025 (Callen - France)

"In nature you will find what no master can teach you", says the sage...

Child of Earth & Sky, in/sensible animal, stardust, spirit among the Spirits; the deep quest of human beings is to find their rightful place in the Great Web of the living. The natural magic that Life offers is infinite for those who are open to dialogue and cooperation with it. This is what this shamanic workshop invites you to explore.

Honouring, celebrating, re/connecting with the Source, the essence, the magic and the beauty of the Earth & Sky... This end-of-summer workshop will focus on adventures in nature, shamanic rituals and other journeys to help you, not to walk in the footsteps of the sages, but to search what they were looking for!
